

TAO LI

Professor

Director of MS Program in Business Analytics
Department of Information Systems and Analytics
Leavey School of Business, Santa Clara University
500 El Camino Real, Santa Clara, CA 95053
Phone: (408) 554-6951; email: tli1@scu.edu

EDUCATION

The University of Texas at Dallas, Richardson, TX

Ph.D., Management Science, (GPA 3.9) Advisor: **Suresh P. Sethi**

Tianjin University, Tianjin, China

B.S., Materials Science and Engineering & Financial Management

ACADEMIC POSITION

Leavey School of Business, Santa Clara University, Santa Clara, CA

Department of Information Systems and Analytics

<i>Professor</i>	Sep/2026–Present
<i>Director of MS Program in Business Analytics</i>	Feb/2020–Present
<i>Co-Lead of Prometheus Lab for AI and Business</i>	Sep/2023–Present
<i>Coordinator of MBA Program Concentration in Data Sciences and Business Analytics</i>	Mar/2022–Present
<i>Coordinator of Analytics Showdown for MS Programs</i>	Jan/2022–Present
<i>Advisory Board Member of Ciocca Center for Innovation and Entrepreneurship</i>	Sep/2022–Aug/2025
<i>Associate Professor</i>	Sep/2018–Aug/2026
<i>Assistant Professor</i>	Sep/2012–Aug/2018

TEACHING EXPERIENCE

Professor, Santa Clara University (Average Teaching Rating > 4.5/5) 2012–Present

- Machine Learning with Python (ISBA 2403; Core Course for MS in Business Analytics)
- Data Analytics with Python (ISBA 2402; Core Course for MS in Business Analytics)
- Prescriptive Analytics with Python (ISBA 2405; Core Course for MS in Business Analytics)
- Dashboards with Tableau (ISBA 2404; Core Course for MS in Business Analytics)
- Linear Algebra with Python (ISBA 2000; Core Course for MS in Business Analytics)
- Business Analytics (OMIS 3000; Core Course for MBA)
- Operations Management (OMIS 3252; Core Course for MBA)
- Analytical Decision Making (OMIS 3202; Core Course for MBA)
- Operations Management (OMIS 3357; Core Course for Accelerated MBA)
- Computer Based Decision Models (OMIS 2355; Core Course for MS in Information Systems)
- Predictive Analytics (OMIS 115; Core Course for BS in Business Analytics)
- Data Analytics with Python (OMIS 114; Core Course for BS in Business Analytics)
- Data Visualization with Tableau (OMIS 112; Core Course for BS in Business Analytics)
- Prescriptive Analytics (OMIS 109; Core Course for BS in Business Analytics)
- Operations Management (OMIS 108S; Core Course for Undergraduate Leavey Scholars & University Honors)
- Sustainable Operations Management (OMIS 108E)
- Operations Management (OMIS 108; Core Course for all Undergraduate Business Majors)

Instructor, The University of Texas at Dallas (Average Teaching Rating > 4.5/5) 2011–2012

- Operations Management (Core Course for all Undergraduate Business Majors)

Temporary Tutorial Instructor, The University of Texas at Dallas Fall 2010

- Supply Chain Management/Demand and Revenue Management (MBA Courses)

Tutorial Instructor, The University of Texas at Dallas Spring 2010

- Optimal Control (Ph.D. Core)

INDUSTRY EXPERIENCE

Uber

Jul/2026–Present

- Project Advisor. Supervising a project focused on applying machine learning and inferential statistics to identify advertising dispute drivers and flag high-risk transactions in the England market. Guided the analytical approach and solution design, with a scope spanning historical data analysis, automated dispute classification, predictive modeling, and proof-of-concept development. The project aimed to reduce payment disputes, mitigate revenue leakage, and improve operational efficiency, supported by a roadmap for integration with Uber’s FinTech infrastructure and expansion to other markets.
- Project Sponsor: David Majors (Head of Order-to-Cash, Global Process Owner)

Lam Capital

Jul/2026–Present

- Project Advisor. Supervising a project focused on modernizing investment data management and portfolio analytics. Guided the team’s approach to automating financial data extraction from PDF and Excel reports, designing a centralized portfolio data repository, and developing business intelligence dashboards for equity ownership tracking, investment performance analysis, and internal rate of return (IRR) calculations. The project aimed to strengthen data integrity, reduce manual entry and reconciliation, and align reporting across investment management and corporate accounting.
- Project Sponsor: Eva Liu (Portfolio Manager)

Roblox

Jan/2026–Jun/2026

- Project Advisor. Supervised a project applying NLP and large language models to evaluate interviewer effectiveness from real hiring interview transcripts. Guided development of an LLM-based scoring framework covering behavioral dimensions such as active listening, structured interviewing, job-related probing, and time management, and directed its validation against expert human ratings using inter-rater reliability metrics and a bias and reliability audit. The work culminated in an analytics dashboard surfacing interviewer performance patterns and development opportunities, demonstrating how data-driven evaluation can improve fairness, consistency, and quality in hiring at scale.
- Project Sponsor: Philip Simmons (Manager, People Science)

NTT DATA AIVista

Jan/2026–Jun/2026

- Project Advisor. Supervised a project to build an onboarding agent that takes new hires from “you’re hired” to “you’re ready for day one.” It delivers a single, coordinated experience across HR, IT, Legal, and Finance. Behind the scenes, the agent runs the full onboarding journey by integrating with the tools used across NTT DATA AIVista — handling background checks, immigration, orientation and welcome, equipment selection, payroll, and compliance touchpoints — while keeping everyone aligned through clear task assignments and a live, LLM-powered status summary. Internal teams step in only when a decision is needed; routine updates, reminders, and tracking happen automatically. The result is a smoother experience for new hires and a more consistent onboarding process for the company. New hires can also ask everyday policy questions in plain language and get answers grounded in the company’s own policies — turning onboarding into a conversation rather than a stack of documents.
- Project Sponsor: Bratin Saha (Chief Executive Officer)

LatentView

Jan/2026–Jun/2026

- Project Advisor. Supervised a project that shifted customer-retention planning from reactive 28-day inactivity flags to proactive, four-week-ahead intervention. The team engineered 40+ behavioral, ecosystem, and lifecycle-marketing features and trained an F2-optimized XGBoost–CatBoost ensemble with a logistic regression meta-learner, then deployed a containerized FastAPI–React GenAI RAG application that turned dormancy-risk scores into targeted campaign recommendations and drafts for marketers.
- Project Sponsor: Prasun Velayudhan (Director, Global Business Unit Head)

DigitalOcean

Jan/2025–Sep/2025

- AI Consultant. Supervised a project to develop a user-friendly web interface that enables potential customers to upload receipts or invoices from major cloud computing providers (e.g., AWS, Azure, Google Cloud) and compare costs against DigitalOcean's pricing. The system will leverage Large Language Models (LLM) for text extraction and processing, image recognition for parsing receipts, and a structured database to store and analyze pricing information.
- Project Sponsor: Bratin Saha (Chief Product and Technology Officer)

Roblox

Jan/2025–Jun/2025

- Project Advisor. Supervised a project to develop a proof-of-concept solution that can 1. Automatically extract key themes and insights from session transcripts. 2. Conduct sentiment analysis to gauge participant reactions. 3. Flag critical moments of confusion, frustration, or emerging usability issues that may otherwise be overlooked. 4. Provide recommendations for integrating existing AI/NLP/LLM tools into the workflow.
- Project Sponsor: Arvind KC (Chief People and Systems Officer)

LatentView

Jan/2025–Jun/2025

- Project Advisor. Supervised a project to develop a robust analytical framework that empowers marketers to optimize their campaigns by providing deep insights into key metrics such as brand performance, product categories, campaign timelines, marketing channels, costs, revenues, and profits. By aligning marketing strategies with broader objectives, this framework ensures campaigns are highly efficient, impactful, and focused on delivering meaningful business outcomes.
- Project Sponsor: Prasun Velayudhan (Director, Global Business Unit Head)

Teladoc Health

Jan/2023–Feb/2025

- AI Lead. 1. Developed a chatbot (AIVA) that capitalizes on core technologies like ML, NLP, Gen AI, Microsoft Azure, Copilot Studio, and Power Automate, OpenAI API, and Workday API to not only guide or provide answers but also to perform transactions on behalf of an employee. 2. Developed a predictive model for provider/talent recruitment and retention strategies using ML and NLP. 3. Created a variety of dashboards for the people experience team.
- Project Sponsor: Arnon Geshuri (Chief People Officer)

Jibu Inc.

Jan/2024–Jun/2024

- Project Advisor. Supervised a project to predict purified water demand for different franchises in different time periods using ML models including random forest, gradient boosting, and LSTM/GRU that leverage the weather condition, stock market, and pricing. Built Tableau dashboards to visualize all data sources.
- Project Sponsor: Antonia Nalunga (Chief Operations Officer)

Intuitive Surgical, Inc.

Jan/2023–Jun/2023

- Project Advisor. Supervised a project to analyze speech transcripts at events such as earnings calls and investor conferences to generate business insights by developing a pipeline to identify, extract, and label topics and key conversations in transcripts, performing sentiment analysis on the conversations, and creating a log of the core message of the conversation history for each topic.
- Project Sponsor: Brandon Lamm (Sr. Manager, Investor Relations)

Amazon Web Services (AWS)

Jan/2022–Jun/2023

- Project Advisor. Supervised a project, with the external data from the customer intelligence portal at AWS, to develop an algorithm to prioritize the customers and next sales actions, i.e., which customers have the best potential for closing a sale, and what sales actions are necessary to move a deal forward.
- Project Sponsor: Swati Choksi (Senior Leader, Solutions Architecture)
- Project Advisor. Supervised a project to apply a set of financial tools recently launched on AWS SageMaker JumpStart on a dataset of quarterly earnings calls and build a demo use case to analyze earnings calls with machine learning. Earnings calls are widely employed by industry players as a source of forward-looking information. The objectives of this project include (1) Build a large dataset of earnings calls (audio files and transcripts)

downloaded from various sources on the web. (2) Collect daily stock return data for each ticker in the sample for a month before and after the earnings call and join it with the transcripts. (3) Collect SEC filings for each quarter for all tickers and quarters in the sample and join the data to the transcripts. (4) Use ML to fit a stock prediction model using the multimodal dataframe created in (1)-(3). (5) Use Transformer models to summarize earnings calls transcripts (both, the management section and the analyst Q&A). (6) Build a question-answering system for the text of SEC filings and earnings calls. Come up with a list of questions that financial analysts may want to ask about these reports. (7) Score each ticker's earnings calls and build a document comparison between quarters. (8) Come up with a way to use ML on the audio files for the same tasks.

- Project Sponsor: Bratin Saha (VP and GM at Amazon), Sanjiv Das (Amazon Scholar)

Rubrik, Inc.

Jan/2022–Jun/2022

- Project Advisor. Supervised a project to predict pipeline to booking conversion ratio for different categories by leveraging various machine learning and time series models.
- Project Sponsor: Sham Reddy (Director of Data, BI & Advanced Analytics)

Cloudera, Inc.

Jan/2022–Jun/2022

- Project Advisor. Supervised a project to help Cloudera to analyze their industry and revenue size band grouping penetration relative to the competitors. Use these relative penetration rates as an indicator for the likelihood of landing/expanding and/or churn risk. Based on IT spend and competitor penetration, find the largest market segments (defined by industry, size, geo) based on TAM for Cloudera's products. Use Diag bundle to determine which market segments have the largest installs/consumption footprints. Use this as a proxy for the data intensity of a market segment and use as an opportunity sizing data point (like TAM).
- Project Sponsor: Thibault Aimé (Director of Corporate Strategy)

Adobe Inc.

Jan/2021–Dec/2021

- Project Advisor. Supervised a project to develop a tool/system which identifies and isolates cohorts of customers with atypical product engagement patterns as well as those customer cohorts which are driving overall engagement trends. The resulting customer cohorts are then brought to the attention of the relevant internal stakeholders to act on, if appropriate.
- Project Sponsor: Matt Bergstrom (Director of Product & Customer Analytics)

Nuveen, A TIAA Company

Jan/2021–Jun/2021

- Project Advisor. Supervised a project to enable diversification across product offering by building cross sell & retention models which helped to target high risk individual advisors. This project identified anomalies in advisor behaviors and helped to take actions in a timely manner. Besides data science modeling, this project also helped to build life cycle analytics to measure prospecting, client acquisition, client development and retention.
- Project Sponsor: Santanu Sengupta (Managing Director)

Atollogy, Inc.

Jan/2019–Dec/2020

- Project Advisor. Supervised two projects. The goal of the first project is to build a dashboard to visualize large volumes of sensor data that can provide customers a lens into the day to day operation of their machines, and then to aggregate this data into patterns and metrics that are more insightful over a larger period of operation (weekly/monthly etc.). The goal of the second project is to build a machine learning model to recognize and correct the misread vehicle license plate numbers caused by irregular stoppage times of vehicles and many other factors.
- Project Sponsor: Rob Schoenthaler (CEO)

GRANTS, AWARDS, AND HONORS

- Tao Li (PI). Research on Complex Dynamic Pricing Problems Based on Reinforcement Learning. National Natural Science Foundation of China (NSFC#72671066), RMB 400,000 (Approx. \$60,000) 2027–2030
- Tao Li (PI). Fairness-Aware Personalized Dynamic Pricing using Deep Reinforcement Learning. SCU Leavey Research Grant (GR104690), \$4,000 2026–2028
- Tao Li (PI). Optimal Pricing Strategy of Online Retailer Based on Augmented Reality. SCU Leavey Research Grant (GR104940), \$3,900 2026–2028

CONFERENCE PRESENTATIONS

Plenary Speaker of Annual Conference of Stochastic Service and Operations Management, ORSC at Chengdu, China Jul/2023

- *Retail Platform Analytics: Practice, Literature, and Future Research*

- INFORMS Annual Meeting at Indianapolis, IN Oct/2022
- *Product Sharing: A Threat or an Opportunity for Competing Manufacturers?*
- POMS Annual Meeting (Virtual) May/2021
- *AI Automation and Retailer Regret in Supply Chains*
- POMS Annual Meeting at Washington, D.C. May/2019
- *Product Sharing: A Damage or an Opportunity for Manufacturers and Consumers*
- The Eleventh Annual International Conference of the Chinese Scholars Association for Management Science and Engineering at Ningbo, China Jul/2018
- *Pricing and Carbon Emission Reduction Decisions for Vertically Differentiated Firms with Consumer Preference*
- POMS 2017 International Conference at Sydney, Australia Dec/2017
- *Carbon Emission Reduction Strategies for Two Competing Firms under Cap-and-Trade Regulation with Consumers' Preference*
- The Tenth Annual International Conference of the Chinese Scholars Association for Management Science and Engineering at Guangzhou, China Jul/2017
- *Carbon Emission Reduction Strategies for Two Competing Firms under Cap-and-Trade Regulation with Consumers' Preference*
- The Eighth POMS-HK International Conference at Hong Kong, China Jan/2017
- *A Responsive-Pricing Retailer Sourcing from Competing Suppliers Facing Disruptions*
- The Ninth Annual International Conference of the Chinese Scholars Association for Management Science and Engineering at Hefei, China Jul/2016
- *A Responsive-Pricing Retailer Sourcing from Competing Suppliers Facing Disruptions*
- INFORMS International Meeting at Waikoloa, HI Jun/2016
- *Five Steps to Supply Chain Coordination*
- POMS Annual Meeting at Orlando, FL May/2016
- *Five Steps to Supply Chain Coordination*
- The Seventh POMS-HK International Conference at Macau, China Jan/2016
- *Mitigating Supply Uncertainty: The Interplay Between Diversification and Pricing*
- INFORMS Annual Meeting at Philadelphia, PA Nov/2015
- *Consumer Search, Transshipment, and Bargaining Power in a Supply Chain*
- The Eighth Annual International Conference of the Chinese Scholars Association for Management Science and Engineering at Shenyang, China Jul/2015
- *Mitigating Supply Uncertainty: The Interplay Between Diversification and Pricing*
- POMS Annual Meeting at Washington, D.C. May/2015
- *Mitigating Supply Uncertainty: The Interplay Between Diversification and Pricing*
